

Information Paper

SUBJECT: T700-GE-701C 5-Day Modular Maintenance Course

1. Purpose: For the UASSD Maintenance Evaluator's that attended the T700-GE-701C 5-Day Modular Maintenance Course on 28 November – 3 December 2004 to provide course feedback on the course description, outline, points of contact, and cost.
2. Description: The 5-Day Modular Maintenance Course is specifically designed to train unit and intermediate level maintenance personnel responsible for flight-line and engine shop inspections and maintenance procedures. Even though this course was not specifically designed for the Maintenance Test Pilot this course provides valuable insight for engine troubleshooting.
3. Course Outline: The outline of the course includes five main sections.
 - Introduction
 - Basic Engine Discussion
 - System Description
 - Power Control
 - Shop Work
4. Points of Contact: The point of contact for acquiring a list of available classes is James Fahey. Even though he is the UH60 Black Hawk NET Manager he will also put AH64 and H60 personnel on the class list. In addition, Mr. Fahey will also provide a list of local hotels and supplemental course information. One of the primary instructors for the course is Jeffrey Biehl. Once assigned a class date he can also provide any additional course information.

James M. Fahey
UH-60M Black Hawk NET Manager
U.S. Army Aviation and Missile Command
Materiel Fielding and New Equipment Training Logistics Support Division, Readiness
Directorate, IMMC 256-876-9540 or DSN 746-9540
